

*When a
chronic disorder
requires permanent
treatment*

ASP PERMA by

 Before use, read the instructions carefully.

The ASP PERMA reinforces your therapeutic arsenal!

The **ASP PERMA** is a needle designed for **auricular acupuncture**. It rounds out the **ASP ORIGINAL** family.

Implantable beneath the skin of the auricle, it provides **permanent stimulation** of the treated point.

The **ASP PERMA** **takes the place** of repeated implantations of the **ASP ORIGINAL Classic, Gold or Titanium**.

The **ASP PERMA** is used for **chronic pathologies** such as permanent pain, mental disorders (depression, anxiety, dizziness, etc.), persistent neurological problems, chronic functional disorders and addictions (alcohol, tobacco, etc.), following repeated implantations of the **ASP ORIGINAL**.

It is precisely and painlessly inserted due to its ingenious **metal piston** that guides the needle to exactly where you want to implant it.

You will quickly find that the ASP PERMA becomes indispensable.

In medical **Titanium**, in a **sterile** blister pack, it ensures optimum **biocompatibility**. It eliminates all risk of inflammation, as it is completely protected by scar tissue. It can be easily and quickly removed using a small incision if necessary, even though it has been designed to stay in place indefinitely.

The **ASP PERMA**, easily identifiable because of its blue base, is available in 8-needle packs.
